WHO WE ARE

Protec Africa Group is a new, dynamic and first of its kind across the African Continent. We are born from a French Parent company that has recently acquired a number of well-established high end organisations and formed a unique offer in our sector.

Our goal is to build on the exceptional reputation that the individual company's have across Europe and provide a high end service for the established and emerging markets in Africa. Our UK/Africa business already has a strong growth platform with offices in Lagos in Nigeria, Nairobi in Kenya and our African head office in Johannesburg in South Africa.

Our product and service offering, perfectly positions us to service a diverse spectrum of companies, from SMEs through to companies that have a presence across Africa, we are able to interact with all industry sectors, whatever their size.

WHAT WE DO

Protec Group Africa provides the following:

- * Health, Safety and Environmental Consultancy.
- * Infection Control Services and Products (Protection against chemical and biological agents).
- * Testing Laboratories (static and mobile).
- * Health, Safety, and Environmental Training.
- * Decontamination Services and Products
- * High End Personal Protective Equipment (Nuclear, Petrochemical, Pharmaceutical, Military).
- * Asbestos remediation and consultancy services.

“We are delighted to have launched the Groupe Protec family into the African market. We believe that our existing and new clients will enjoy the benefit of purchase synergy across consultancy, training, products, hire services, maximising efficiency and cutting costs considerably.”

PPS (PROFESSIONAL PROTECTIVE SYSTEMS)

A innovative long establish British company at the forefront of personal protection against Nuclear, Biological and chemical agents. For over 70 years it has been known worldwide for its high end products that protect us from the spread of infection through control systems, decontamination, isolation and containment.

PPS products are used by some of the worlds most safety and health conscious organisations that operate in the most high risk environments. The company's unique welded suit systems are known for their capability in the most exacting conditions. Our suits range from affordable basic coveralls up to full air tight gas suits and specialist nuclear and petrochemical protective products with the highest certification on the market.

In addition to our Personal Protective Equipment, we also manufacture Rapid Pro Decontamination Showers and Shelters which are perfect for field based emergency response situations. Our products are used for infection management in situations such as Ebola, Cholera and Anthrax. Making our products an attractive proposition for both the military and peacekeeping missions.

Full Suit AirFed - High Risk

AMS (AIR MANAGEMENT SYSTEMS)

Launched in 1994, Air Management Systems (AMS) has established itself as one of Europe's leading suppliers of asbestos removal consumables, plant and equipment, supplying thousands of companies.

Manufacture

We manufacture our own range of equipment from our production site in the UK. This includes:

- * Negative pressure units
- * Decontamination trailers
- * Modular showers
- * Water management systems
- * Pumped filtration systems
- * Bespoke container decontamination units
- * Fume cabinets

Our highly successful business in Europe has been recognised by customers in Africa, who have requested to purchase our products locally. Customers overwhelmingly supported our product hire format, which we will be supporting and rolling out across Africa.

As we have an outstanding knowledge of the asbestos industry, we are also able to manage bespoke projects and provide unique solutions to some of the world's most difficult asbestos problems that we are currently faced with.

PROTEC CONSULTANCY

Our Consulting division provides a wide range of Safety, Health and Environmental services giving our clients a truly comprehensive “one stop” service to all their SHE requirements. We have a highly experienced local and international team of consultants and trainers who have one of the broadest and most diverse set of skills in the industry.

Consultancy

We are able to supply advisors and auditors for a whole range of services, from single day SHE reviews to teams of advisors for major projects such as new oil refineries, large construction projects like shopping malls, dams and waste to energy plans etc.

Our team of consultants can provide:

- * Full Health & Safety Documentation – Bespoke Health and Safety management systems integrated into your business.
- * Health and Safety Audits and Reviews – ranging from periodic site audits to full Critical H&S Audit campaigns across several countries.
- * Fire Risk Assessments, Fire Safety Audits and Reviews –conducted in accordance with UK Fire Safety legislation; a standard aspired to by international organisations.
- * HSSE Supply Chain Accreditation Service – Reduce your liability and exposure to the unsafe working practices of 3rd-party workers on your sites and premises.

We also have specialism in the decontamination field and are experts in asbestos and legionella control, as well as being able to offer remediation management.

Training

We have a suite of over 200 international SHE training courses that we can deliver to individual companies and many are delivered on an “open/public” scheduled basis.

Our portfolio ranges from short half day courses all the way through to Diploma level programs. We also can provide a wide range of “E Learning” short course modules.

Petroleum Downstream Training

In the petroleum retail industry, we are recognised as the leading company to provide specialist services in training, consultancy and advice. We have for a long time provided vital training for the supply chain and are the world’s largest providers of the industry leading “Safety Passport” schemes.

SCOTT SAFETY

Scott Safety is a world leader in the design, manufacture and sale of high performance respiratory protection products, monitoring and sensor equipment and other protective solutions for the fire services, petroleum, chemical, construction, industrial and emergency services including first responders, law enforcement, military and civil defence.

We are proud to have a unique agreement and partnership with Scott Safety, which complements our own portfolio of manufactured products and we are distributing these products through our main centres in Africa.

BLASTRAC

Introducing Blastrac to Africa, a new and dynamic product range which is going to save many industries considerable time and money on surface preparation work. They are the leading international developer of surface preparation equipment, with over 50 different machines being made available to the African market.

Typical application has been around decorative, industrial flooring and remediation works. The aviation industry has become a key customer, as our products are ideal for the life extension of runway tarmac which has constant attention for build-up of rubber and “white lining” renovation.
